Island Spas™

HYDROTHERAPY BENEFITS

What is hydrotherapy?

Hydrotherapy is the use of water to revitalize, maintain, and restore health. Hydrotherapy, which has been used for centuries, today treats muscle pain, joint injuries, and arthritis. In addition, hydrotherapy relieves stress and helps you achieve a sense of well-being. Any of our high-performance Island Spas will help you obtain the greatest possible benefits of hydrotherapy. Enjoy precious, relaxing moments in the luxury of this aesthetically pleasing, quality-built spa.

What are the benefits of hydrotherapy?

Hydrotherapy is an age-old form of healing and stress relief based on three simple principles: heat, buoyancy, and hydro-massage (water movement). According to the National Center for Complementary and Alternative Medicine (NCCAM), hydrotherapy aids the injury rehabilitation process, and reduces the pain and inflammation of arthritis and other rheumatologic conditions. In addition, hydrotherapy reduces the effects of stress by increasing endorphin production and improving sleep quality. We at Artesian Spas are committed to enhancing your health, your quality of life, and your precious relaxation moments by designing and producing the highest quality and best performing spas available.

ADVANCED TECHNOLOGY

HELIX INSPIRED: A New Spin on Spa Jets

The Island Spas line features a revolutionary breakthrough in hydrotherapy jetting that makes use of the timeless concept of a helix, a curve in three-dimensional space such as that found in a spiral staircase. This Artesian Spas patented jet design provides a truly remarkable hydro-massage. Engineered with the concept of the double helix in mind, the jets use a right-directional spiral on the inside of the cylinder. This causes water to spiral out in a twisting motion, providing jet pulsation and heightened massage pressure.

The two largest helix jets, named **ProHelix™**, provide a high volume of water to massage large muscles in the body. The midsize helix jet, called **TheraHelix™**, is strategically placed in the spa in small groups to massage muscles such as the calves, hamstrings, deltoids, biceps, and triceps. The smallest helix jet, the **AccuHelix™**, is placed in large groupings to massage larger regions of the body, such as the entire back. As a complete system, four to five different sizes of helix jets are featured in every Island Spas model.

GREEN TECHNOLOGY

GREEN TECHNOLOGY MEANS ENERGY EFFICIENCY

You can relax knowing that luxury and high performance does not mean increased consumption and higher costs. This line of spas uses an energy-efficient circulation system, along with switchless motors, that delivers high performance and reliability. This makes Island Spas more efficient than any traditionally-built spa in the industry.

Environmentally Conscious

- Our maintenance-free, synthetic Kingwood cabinets do not rust or warp, reducing the need for replacement.
- High density Icynene® foam fills the space between the cabinet and the shell providing the highest level of insulation possible.
- Our spa covers upgraded to ProGuard offer the best heat retention available.

Environmentally Friendly Water Treatment

- The Crystal UVC Water Sanitation System is the natural way to obtain a crystal clean spa. Using a combination of ultraviolet light, 24-hour circulation, microfiltration, and the Nature 2 mineral treatment, we are able to achieve maximum water clarity while using far fewer chemicals.
- The ProPure Ozone Water Sanitation System combines the use of Nature2, Ozone Generator, Mazzei Injector, and the ProPure™ Mixing Chamber to concentrate the water purification process.
- Both systems use Nature2, a silver mineral treatment component that screws directly into the microfilter to naturally destroy bacteria and algae, thus reducing the need for chemicals.

WhisperPure Circulation System Benefits

- The WhisperPure Circulation System circulates water through the microfilters and the heater up to 100 times a day. It delivers clean, regulated water 24 hours a day with a low operating cost.

The Ultimate Island Spa

The Bimini is designed to accommodate large families or extra guests, along with providing the option for those that want an exercise feature. This specially designed spa is equipped with ten seats, two personal loungers, a cool down seat, and the option of a row seat.

*Bimini acrylic shell available only in:
Silver Marble, Starry Night Blue (limited stock), Moonscope, and Quartz.

Bimini

91 x 132 x 36
231 x 335 x 91 cm

Bimini Exercise 75 | Acrylic: Silver

THE ULTIMATE ISLAND SPA

BIMINI SPA

There is so much to love about owning our largest Island Spas model:

- Two full-body loungers, handcrafted and molded to support your body in a natural position.
- The patented, helix inspired jet design that provides a double spiral jet pulsation for the ultimate massage.
- Multiple air and diverter controls that allow air variation and altered pressure to adjust massage and comfort level.
- Cascade waterfall with LED lighting options that will turn any backyard into an oasis.

ROWING SEAT OPTION

The rowing seat option offers a smooth, low-impact, and non-load bearing workout. This method of rowing allows an even distribution of exercise by spreading the intensity over three major muscle groups: the torso, legs, and arms; toning and defining without strain. Rowing is also great for aerobic endurance, joint health, increased flexibility, and weight loss.

**Spa heat increases heart rate, therefore we recommend exercise routines should be performed at a water temperature between 77F and 82F.*

Advanced Mixing Chamber Water Clarification System

The secret to this system is the combined efforts of the **Nature2**, **Ozone Generator**, **Mazzei Injector**, and the **ProPure™ Mixing Chamber**. Together, these elements create quality clean spa water by concentrating the water purification for a longer period of time.

Easy as 1-2-3:

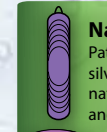

1. Ozone generator creates ozone
2. The Mazzei Injector shoots ozone into the mixing chamber, mixing in water and air
3. The chamber allows the ozone to remain undiluted for a longer period of time to kill more bacteria, fungi, and viruses than if directly injected into the spa

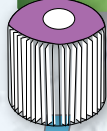

Ozone System

Spa Water

Nature2[®]
Patented technology that uses silver and copper minerals to naturally destroy bacteria and algae.

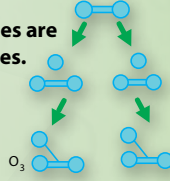

Microfiltration
This filter removes contaminants such as dirt, metals, and oil by water passage through a microporous membrane. Larger particles are trapped in the upper layer. Smaller particles, in the 1-5 micron size, are trapped in the lower part of the composite. The pleated filter has exceptional dirt holding capacity and low pressure drop. It retains its shape and is excellent for water filtration. The polyester construction is resistant to most chemicals.

Corona Discharge
This is how ozone is produced in the lower atmosphere via lighting. The ozone generator utilizes an electrode to produce ozone in high quantities.

Oxygen molecules are split by electrodes.
Oxygen atoms unite with other oxygen molecules to produce ozone.

Drawing Ozone
The Mazzei Injector draws the ozone out of the ozone generator and then injects it directly into the ProPure[™] Mixing Chamber.

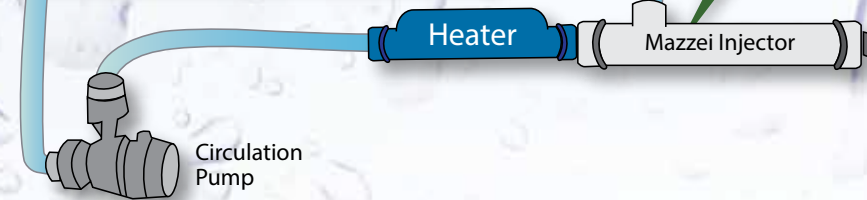

CD OZONE

Heater

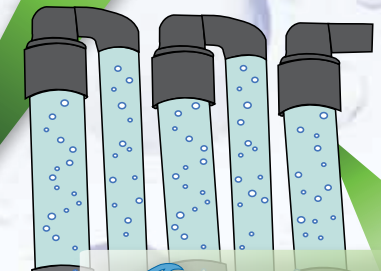

Mazzei Injector

Circulation Pump

Spa

ProPure[™] Mixing Chamber
The ozone generator produces ozone and the Mazzei Injector then shoots ozone into the ProPure[™] Mixing Chamber, where it mixes with water and air. This chamber keeps the ozone concentrated in a small body of water. The isolated chamber allows the ozone to remain undiluted, hence it can efficiently kill more bacteria, fungi, and viruses than if it was directly injected into the entire spa.

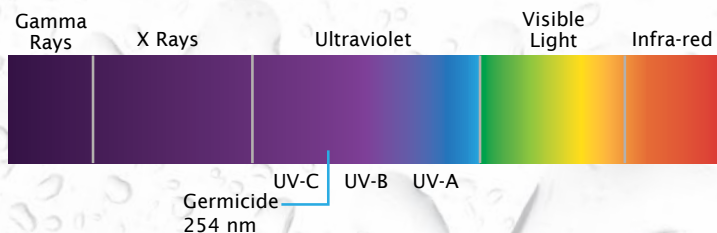

How Ozone Sanitizes Spa Water
An oxidation reaction occurs upon collision between an ozone molecule and a molecule of an oxidizable substance (i.e. bacteria, fungi, mold, yeast, viruses, forms of iron, magnesium, and more). The weak bond splits off leaving oxygen as a by-product. During an oxidation reaction, organic molecules are changed and dissolved. This process also combines metals together, forming larger masses so the micron filter can easily filter them out of the spa water.

Natures Way to a Crystal Clean Spa

Artesian Spas introduces a green solution using the combination of Nature2, microfiltration, a circulation pump, and ultraviolet light purification to relieve issues of harsh chemicals, off-gas, irritation, and the need for excessive maintenance. This complete, reinforced sanitation system takes the worry out of spa maintenance with its key components:

- **Nature2** utilizes silver and copper minerals to naturally destroy bacteria and algae.
- **Microfilters** remove contaminants such as dirt and oils. (1-5 microns)
- **Circulation Pump** provides a low operating cost with a high efficiency water circulation pump that filters up to 30 gallons per minute, sanitizing water more than 100 times a day.
- **UVC Unit** produces ultraviolet light inside the quartz chamber using a powerful UVC ray lamp. This lamp produces the optimum wavelength for destroying and eliminating future reproduction of micro-organisms. At 254 nanometers, the system's high germicidal light ray protons combats and destroys viruses, bacteria, algae, yeast, mold, and organisms. Today, this same technology is used in water bottling companies and for hospital equipment sterilization.

Benefits

- Natural Ultraviolet Light
- Kills 99.5% of Germs
- Effective, Reliable, and Effortless
- Easy Maintenance
- Ideal for Sensitive Skin
- Clean, Safe, Odorless
- UL/CE/EPA Approved

SETTING THE STANDARD INSIDE & OUT

QUALITY CHECKLIST

- Energy Efficient Circulation System that Uses Only 115 Watts
- Switchless Motors to Ensure Pump Life Longevity
- Full Flow Plumbing that Reduces Flow Resistance
- Thermoform ABS PermaBase Pan Upgrade that Completely Seals the Underside of the Spa to the Very Edge
- High Density Icynene® Foam Insulation Between the Cabinet and Shell
- Lifetime Structure Warranty
